MARY POPPINS RETURNS

In 1964, Walt Disney produced what is considered Disney's crowning live-action achievement Mary Poppins, based on P. L. Travers's book series. The film, which combines live-action and animation, stars Julie Andrews in her feature film debut as Mary Poppins, who visits a dysfunctional family in London and employs her unique brand of lifestyle to improve the family's dynamic.

Now director Rob Marshall has created Mary Poppins Returns, a sequel to the 1964 film starring Emily Blunt as Mary Poppins, with Lin-Manuel Miranda, Ben Whishaw, Emily Mortimer, Julie Walters, Dick Van Dyke, Angela Lansbury, Colin Firth, and Meryl Streep in supporting roles.

Set in 1930s London, twenty-four years after the events of the original film, the film sees Mary Poppins, the former nanny of Jane and Michael Banks, returning one year after a family tragedy.

It was chosen by both the National Board of Review and American Film Institute as one of the top ten films of 2018 and received numerous award nominations, including four at the 76th Golden Globe Awards and three at the 72nd British Academy Film Awards. It also received four Academy Award nominations for Best Original Score, Best Original Song, Best Production Design, and Best Costume Design at the 91st Academy Awards.

MAGICAL LAND OF OZ

Across Australia, as the dawn rises the marsupials go to bed - except for the ones that don't - because there are exceptions to every rule in this land of ancient wonders, big skies and jewelled seas. Magic does not have rules. It has splendid dragons, saltwater monsters and dancing spiders.

Magical Land Of Oz offers a blue chip, continent-wide series ranging from Australia's highest snow peaks to the depths of the frigid and wild southern seas; from its last populations of wild numbats to its largest diorama of giant cuttlefish. It's a land of diverse beauty, that delights and surprises. The series both entertains and deepens our understanding of how the natural world is made up of not just unique species, but distinct individuals, whose lives are far from predictable.

In the episode we are screening onboard, we move from the continent's snow-covered peaks to its ancient rainforests and tropical savannahs, discovering how it is animals have learnt to thrive across the continent's harsh and beautiful extremes.
